The Regeneration of Challenging Bone and Soft Tissue Defects: Where Are We in 2025?

THURSDAY, APRIL 24TH 2025 | 5:30 PM – 8:00 PM CST

DINNER LECTURE

Eddie V's – 1834 N Loop 1604 W, San Antonio, TX 78248
CE CREDIT HOURS: 1 | Tuition: Complimentary

LEARNING OBJECTIVES:

- How to optimize the treatment planning of a case presenting with soft/hard tissue defects following the so-called Prosthetically Guided Regeneration (PGR) principle
- To present the best documented surgical alternatives, highlighting advantages and disadvantages of each
- How to reduce complexity and morbidity with the aid of digital technologies, with a specific focus on custom-made, CAD/CAM titanium meshes
- To present the preliminary data on the new generation of semi-occlusive custom-made, CAD/CAM titanium meshes

MATTEO CHIAPASCO, MD • MILAN, ITALY

Dr. Matteo Chiapasco is an Oral and Maxillofacial Surgeon, with an MD from the University of Milan. He is a Professor and Head-Unit of Oral Surgery at the University of Milan and Visiting professor at Loma Linda University and University of Lisbon. He is on the editorial board and an expert for several prestigious international journals and the author of over 400 publications in national and international journals and 15 books on oral and maxillofacial surgery. Dr. Chiapasco practices oral and maxillofacial surgery, implant surgery, reconstructive surgery of the facial skeleton for implantological purposes and facial dysmorphic surgery as a freelancer at the Narcodont center in Milan, where he collaborates with a group of colleagues who are experts in dentistry, orthodontics, otorhinolaryngology and facial cosmetic surgery.
