

# Successful Management of Extraction Socket with Severe Bone Defects. No implant failure.

Our Science  
2022/Q3

## Key Message

Ridge augmentation can be performed **successfully** with **Geistlich Bio-Oss<sup>®</sup> Collagen** and **Geistlich Bio-Gide<sup>®</sup>** to manage extraction sockets in compromised molar regions.  
Results: **High volume gain** and **100% implant survival.**

Investigators: Huajie Yu, Lixuan Niu, Lixin Qiu

Therapeutic area

**Extraction Socket Management**

Study set-up / Goal

How effective is Ridge Augmentation with Geistlich Bio-Oss<sup>®</sup> Collagen and Geistlich Bio-Gide<sup>®</sup> in compromised molar regions?
